- Accept invitations

Create your own community

How to find a community

Show up!

- Go to conferences, and local/regional meetings in your area
- Attend world-wide online seminars in your area
- Accept invitations

Create your own community

- Organise learning seminars
- Organise early career networks
- Organise special sessions (or larger workshops)

How to find collaborators

- Talk to your peers at your institution (and others!)
- Ask questions after seminars/conference talks
- Write to authors who post work related to yours on the arXiv
- Participate in collaborative research workshops

Don't worry!

“Networking” sounds intimidating to many early career mathematicians.

In a maths context, it just means **showing up** to mathematical activities.
